Add to this , record videos in english to guide the costumers, and doing some tasks with react in front-end.

PERSONAL RESUME

My career in thecnology started three years ago and I think that I need to start work just with code and take a really big jump in tech, I'm a person that don't rest until find the answer I need , today my experience in front-end with react and javascript is by doing some own projects and doing some tasks at my current job and my experience with back-end is building API's in typescript using nestjs , and in MongoDB and mysql and sql is just management data and not building data bases .

A person who works well in a team and is eager to learn, valuing consistency of results and the frequent search for improvement, with good communication to reach the goal in the fastest way to achieve another objective.

In short, a person prepared to bring results to the company, always seeking to be one step ahead of any problem or unforeseen event. I'm CEO of my marketing digital agency, @valhalla_mkt_ on instagram that I dedicate myself in my free time.
